Streamline Your Web Hosting Experience

Hosting Server Management, Simplified

[HOSTING COMPANY NAME] is partnering with cPanel to offer cPanel & WHM, the top web hosting automation solution to make server monitoring and security easier than ever before.

WHAT IS CPANEL & WHM?

cPanel & WHM is a suite of tools built for Linux operating systems with a simple interface and powerful automations. It removes the complexity of creating advanced server configurations and comes equipped with automatic updates, built-in backups, and all the tools you'll need to get up and running. Manage email, calendar, contacts, and other utilities through the same panel. cPanel & WHM will enhance your [HOSTING COMPANY NAME] experience, giving you robust management and control options for all of the servers we host for you.

Everything to Manage Your Website in One Place

cPanel & WHM is full of features that make complex tasks simple and quick to complete. From managing multiple custom domains, powering your business's email infrastructure, creating databases for your WordPress blogs, and issuing SSL Certificates for your e-commerce sites, cPanel & WHM gives you the power to control your entire web environment. [HOSTING COMPANY NAME] is offering cPanel as your server's easy-to-use management solution. Multiple cPanel accounts are managed by WHM, which is ideal for running your own server through [HOSTING COMPANY NAME] .

[HOSTING COMPANY NAME] takes security seriously, and our partnership with cPanel gives you access to robust security protocols baked into the core. ImunifyAV comes with your cPanel out of the box, and you can add options such as cPHulk, ModSecurity®, and Host Access Control, as well as third-party offerings such as KernelCare and Imunify360.

Routine server tasks and maintenance are simple with cPanel's API automated installations, integrated billing, and the ability to administer your customer licenses.

Webmail on your [HOSTING COMPANY NAME] servers is simple and straightforward. cPanel allows you to create accounts, forwarders, and autoresponders as well as account-level filtering in Webmail and utilize calendars and contacts for personal and business needs.

Your data is important to [HOSTING COMPANY NAME], and cPanel protects your information. With Backup Wizard, site owners can edit and restore files, folders, and websites, partially or entirely, and monitor disk space usage.

Customize the look and style of cPanel & WHM, Webmail, and select notifications, adding your own branding while providing full access to industry-standard software.
